SUBJECT INDEX

Abstracts
Abstracts from the Sixth Meeting of the International Society for Fracture Repair, 279
Selected abstracts from *Der Unfallchirurg*, 70, 230, 391, 520
Acetabulum
Anatomical variations of the lateral femoral cutaneous nerve and the consequences for surgery, 207
Acetabulum, surgery
Intraoperative fluoroscopy to evaluation fracture reduction and hardware placement during acetabular surgery, 414
Acromion, pseudarthrosis
Symptomatic pseudarthrosis of the acromion: report of a case and review of the literature, 63
Amputation
Salvage of open tibial fracture with segmental loss of tibial nerve: case report and review of the literature, 380
Anabolic steroids
Acute compartment syndrome of the triceps and deltoid, 225
Anatomy
Anatomic study of the lateral femoral cutaneous nerve with respect to the ilioinguinal surgical dissection, 17
Anatomical reconstruction of the patellar tendon: a new technique with hamstring tendons and iliotibial tract, 375
Anatomy of the distal knee joint and pyarthrosis following external fixation, 241
Intraarticular anatomic risks of tibial nailing, 247
Safe extracapsular placement of proximal tibia transfixation pins, 236
Should distal interlocking of tibial nails be performed from a medial or a lateral direction? Anatomical and biomechanical considerations, 27
Anatomy, variations
Anatomical variations of the lateral femoral cutaneous nerve and the consequences for surgery, 207
Animal models
Comparison of healing process in open osteotomy model and closed fracture model, 114
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Regeneration of segmental diaphyseal defects in sheep tibiae using resorbable polymeric membranes: a preliminary study, 187
Ankle, fixation
Comparison of tricortical screw fixation versus a modified suture construct for fixation of ankle syndesmosis injury: a biomechanical study, 39
Ankle, fractures
Functional outcome and quality of life in patients with type B ankle fractures: a two-year follow-up study, 363
Ankle, injury
Anterior tibial aneurysm following inversion injury to the ankle, 511
Antibiotics
Efficacy of gentamycin-impregnated resorbable hydroxyapatite cement in treating osteomyelitis in a rat model, 102
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats, 98
Antiglide plate
A biomechanical analysis of internal fixation of complex tibial plateau fractures, 545
Apoptosis
Regulation of osteoblast levels during bone healing, 356
Arm, compartment syndrome
Acute compartment syndrome of the triceps and deltoid, 225
Arterial injury
Anterior tibial aneurysm following inversion injury to the ankle, 511
Arthritis, subtalar
Determining the angle of screw placement for internal fixation of calcaneal fractures, 47
Arthrodesis
Immediate tibiocalcaneal arthrodesis with interposition fibular autograft for salvage after talus fracture: a case report, 589
Arthrodesis, atlantoaxial
Biomechanical study of atlantoaxial arthrodesis: transarticular screw fixation versus modified Brooks posterior wiring, 483
Arthroplasty, knee
Repair of supracondylar femur fracture and unilateral knee replacement at the same surgery, 388
Arthroscopy
Closed reduction/percutaneous fixation of tibial plateau fractures: arthroscopic versus fluoroscopic control of reduction, 426
Aseptic nonunion
High success rate with exchange nailing to treat a tibial shaft aseptic nonunion, 33
Assessment, remote
Emerging technology: remote analysis of traumatic musculoskeletal radiographs transmitted by electronic mail, 516
Autografts, free periosteal
Osteogenic ability of free periosteal autografts in tibial fractures with severe soft tissue damage: an experimental study, 121
Avascular necrosis
Avascular necrosis of the femoral head after intertrochanteric fractures, 134
Changes on magnetic resonance images after traumatic avascular necrosis of the femoral head, 268

Bacitracin
Comparison of castile soap, benzalkonium chloride, and bacitracin as irrigation solutions for complex contaminated orthopaedic wounds, 332
Bacterial adherence
High and low pressure pulsatile lavage of contaminated tibial fractures: an in vitro study of bacterial adherence and bone damage, 526
Bending properties
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Should distal interlocking of tibial nails be performed from a medial or a lateral direction? Anatomical and biomechanical considerations, 27
Benzalkonium chloride
Comparison of castile soap, benzalkonium chloride, and bacitracin as irrigation solutions for complex contaminated orthopaedic wounds, 332
Biomechanics
A biomechanical analysis of internal fixation of complex tibial plateau fractures, 545
Biomechanical analysis of supracondylar femoral fractures fixed with modern retrograde intramedullary nails, 539
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Biomechanical evaluation of impaction fractures of the femoral head, 407
Biomechanical study of atlantoaxial arthrodesis: transarticular screw fixation versus modified Brooks posterior wiring, 483
The biomechanics of hybrid external fixation, 20
Comparative biomechanics of hybrid external fixation, 418
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
Mechanical comparison of plates used in treatment of unstable subtrochanteric femur fractures, 534
Mechanical effect of blocking screws in stabilizing tibia fractures with short proximal or distal fragments after insertion of small-diameter intramedullary nails, 550
Biomechanics, fixation
Comparison of tricortical screw fixation versus a modified suture construct for fixation of ankle syndesmosis injury: a biomechanical study, 39
Biomechanics, patellofemoral
Effects of retrograde femoral intramedullary nailing on the patellofemoral articulation, 13
Biomechanics, testing
Should distal interlocking of tibial nails be performed from a medial or a lateral direction? Anatomical and biomechanical considerations, 27
Blood flow
Early changes in nutrient artery blood flow following tibial nailing with and without reaming: a preliminary study, 129
Blood supply
Minimally invasive plate osteosynthesis: does percutaneous plating disrupt femoral blood supply less than the traditional technique?, 401
Bohler's angle
Bohler's angle: correlation with outcome in displaced intra-articular calcaneal fractures, 554
Bone, damage
High and low pressure pulsatile lavage of contaminated tibial fractures: an in vitro study of bacterial adherence and bone damage, 526
Bone, defects
Regeneration of segmental diaphyseal defects in sheep tibiae using resorbable polymeric membranes: a preliminary study, 187
Bone, healing
Effects of torsional rigidity on fracture healing: strength and mineralization in rat femora, 212
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
Regeneration of segmental diaphyseal defects in sheep tibiae using resorbable polymeric membranes: a preliminary study, 187
Regulation of osteoblast levels during bone healing, 356
Bone, mineralization
Effects of torsional rigidity on fracture healing: strength and mineralization in rat femora, 212
Bone, perfusion
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178

Bone, screw material
The effect of surface material and roughness on bone screw stability, 477
Bone cement, antibiotic-impregnated
Efficacy of gentamycin-impregnated resorbable hydroxyapatite cement in treating osteomyelitis in a rat model, 102
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats, 98
Book review
The Hip. Master Techniques in Orthopedic Surgery, 394
Bowel entrapment
Bowel entrapment within pelvic fractures: a case report and review of the literature, 145
Buttress plate
A biomechanical analysis of internal fixation of complex tibial plateau fractures, 545

Calcaneal flap
Vascularity of the lateral calcaneal flap: a cadaveric injection study, 73
Calcaneus, fractures
Bohler's angle: correlation with outcome in displaced intra-articular calcaneal fractures, 554
Determining the angle of screw placement for internal fixation of calcaneal fractures, 47
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Facilitating edema resolution with a foot pump after calcaneus fracture, 43
Vascularity of the lateral calcaneal flap: a cadaveric injection study, 73
Cervical spine, CT scanning
Computed tomographic scanning of cervical spine fractures: Does it influence treatment?, 338
Children
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
The Monteggia lesion and ipsilateral supracondylar humerus and distal radius fractures, 60
Clavicle, dislocation
Pseudo-dislocation of the sternoclavicular joint, 222
Closed fracture model
Comparison of healing process in open osteotomy model and closed fracture model, 114
Closed revision technique
Treatment of ununited femoral shaft fractures associated with locked nail breakage: comparison between closed and open revision techniques, 494
Colles fractures
Use of the Hoffman 2 compact external fixator in the treatment of redisplaced unstable distal radial fractures, 501
Comminution, posterior femoral neck
Internal fixation of femoral neck fractures with posterior comminution: a biomechanical study, 155
Compartment syndrome
Acute compartment syndrome of the triceps and deltoid, 225
Half-ring external fixation in the management of tibial plafond fractures, 200
Complications
Complications of intramedullary nailing for fractures of the humeral shaft: a review, 258
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Compression plates
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
The spiral compression plate for proximal humeral shaft nonunion: a case report and description of a new technique, 141
Computed tomography
Computed tomographic scanning of cervical spine fractures: Does it influence treatment?, 338
Condyle fractures
Nonunion of a pediatric lateral condyle fracture without ulnar nerve palsy: sixty-year follow-up, 456
Pediatric elbow dislocation associated with a Milch type I lateral condyle fracture of the humerus, 458
Contact forces, patellofemoral
Effects of retrograde femoral intramedullary nailing on the patellofemoral articulation, 13
Contaminated wounds, irrigation
Comparison of castile soap, benzalkonium chloride, and bacitracin as irrigation solutions for complex contaminated orthopaedic wounds, 332
Cortical bone
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
Cubitus valgus deformity
Nonunion of a pediatric lateral condyle fracture without ulnar nerve palsy: sixty-year follow-up, 456
Cutaneous femoris lateralis
Anatomical variations of the lateral femoral cutaneous nerve and the consequences for surgery, 207

Delayed stabilization
Early versus delayed stabilization of pediatric femur fractures: analysis of 387 patients, 490
Deltoid compartment syndrome
Acute compartment syndrome of the triceps and deltoid, 225
Diabetes
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Dislocations
Pseudo-dislocation of the sternoclavicular joint, 222
Dislocations, elbow
Pediatric elbow dislocation associated with a Milch type I lateral condyle fracture of the humerus, 458
Dislocations, hip
Reduction of posterior hip dislocations in the lateral position using traction–countertraction: safer for the surgeon?, 373
Dislocations, reduction
Closed reduction of posterior dislocation of the elbow: a simple technique, 58
The east Baltimore lift: a simple and effective method for reduction of posterior hip dislocations, 56
Displaced fractures
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
Displacement
Bohler's angle: correlation with outcome in displaced intra-articular calcaneal fractures, 554
Distal screws
Should distal interlocking of tibial nails be performed from a medial or a lateral direction? Anatomical and biomechanical considerations, 27
Dynamic compression plate
The spiral compression plate for proximal humeral shaft nonunion: a case report and description of a new technique, 141

Edema
Facilitating edema resolution with a foot pump after calcaneus fracture, 43
Editorials
Controversial topics, 525
Elbow, dislocation
Closed reduction of posterior dislocation of the elbow: a simple technique, 58
Pediatric elbow dislocation associated with a Milch type I lateral condyle fracture of the humerus, 458
Elbow, supracondylar fractures
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
E-mail
Emerging technology: remote analysis of traumatic musculoskeletal radiographs transmitted by electronic mail, 516
Ender nail, broken
Broken Ender nails after fixation of concomitant ipsilateral fractures of the femoral neck and shaft, 509
Erratum
Enhancement of bone apposition to stainless steel cortical screws by surface modification using heat treatment. 12(2):504, 69
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats. 13(2):98–101, 233
Exchange nailing
High success rate with exchange nailing to treat a tibial shaft aseptic nonunion, 33
External fixation
Anatomy of the distal knee joint and pyarthrosis following external fixation, 241
The biomechanics of hybrid external fixation, 20
Comparative biomechanics of hybrid external fixation, 418
External fixation, not ORIF, as the treatment of choice for fractures of the distal radius, 570
External fixation is the treatment of choice for fractures of the tibial plafond, 583
Half-ring external fixation in the management of tibial plafond fractures, 200
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats, 98
Use of the Hoffman 2 compact external fixator in the treatment of redisplaced unstable distal radial fractures, 501
External fixation, hybrid
Early outcome of hybrid external fixation for fracture of the distal tibia, 92
External fixators
Safe extracapsular placement of proximal tibia transfixation pins, 236

Failure, mode
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Fellowships, trauma
Guidelines for orthopaedic trauma fellowships, 437
Femoral cutaneous nerve
Anatomic study of the lateral femoral cutaneous nerve with respect to the ilioinguinal surgical dissection, 17
Anatomical variations of the lateral femoral cutaneous nerve and the consequences for surgery, 207
Femoral head, avascular necrosis
Avascular necrosis of the femoral head after intertrochanteric fractures, 134
Changes on magnetic resonance images after traumatic avascular necrosis of the femoral head, 268
Femoral head, fractures
Biomechanical evaluation of impaction fractures of the femoral head, 407
Femoral intramedullary nails
Effects of retrograde femoral intramedullary nailing on the patellofemoral articulation, 13
Femoral neck, biomechanics
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Femoral neck, fractures
Broken Ender nails after fixation of concomitant ipsilateral fractures of the femoral neck and shaft, 509
Internal fixation of femoral neck fractures with posterior comminution: a biomechanical study, 155
Femoral shaft, fractures
Broken Ender nails after fixation of concomitant ipsilateral fractures of the femoral neck and shaft, 509

Femoral shaft, fractures *(continued)*
Treatment of ununited femoral shaft fractures associated with locked nail breakage: comparison between closed and open revision techniques, 494
Femur, blood supply
Minimally invasive plate osteosynthesis: does percutaneous plating disrupt femoral blood supply less than the traditional technique?, 401
Femur, fixation
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Femur, fractures
Biomechanical analysis of supracondylar femoral fractures fixed with modern retrograde intramedullary nails, 539
Broken Ender nails after fixation of concomitant ipsilateral fractures of the femoral neck and shaft, 509
Early versus delayed stabilization of pediatric femur fractures: analysis of 387 patients, 490
Mechanical comparison of plates used in treatment of unstable subtrochanteric femur fractures, 534
Results of intertrochanteric femur fractures treated with a 135-degree sliding screw with a two-hole side plate, 5
The "swashbuckler": a modified anterior approach for fractures of the distal femur, 138
Femur, intramedullary nailing
Intraarticular heterotopic ossification in the knee following intramedullary nailing of the fractured femur using a retrograde method, 385
Removal of the deeply inserted proximal interlocking screw in the greater trochanter after femoral nailing, 506
Fixation
Broken Ender nails after fixation of concomitant ipsilateral fractures of the femoral neck and shaft, 509
Early fixation of the vertically unstable pelvis: the role of iliosacral screw fixation of the posterior lesion, 107
The effect of surface material and roughness on bone screw stability, 477
Mechanical comparison of plates used in treatment of unstable subtrochanteric femur fractures, 534
Fixation, biomechanics
Biomechanical study of atlantoaxial arthrodesis: transarticular screw fixation versus modified Brooks posterior wiring, 483
Fixation, complications
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Superior gluteal artery injury during iliosacral screw placement, 220
Fixation, external
Anatomy of the distal knee joint and pyarthrosis following external fixation, 241
The biomechanics of hybrid external fixation, 20
Comparative biomechanics of hybrid external fixation, 418
Early outcome of hybrid external fixation for fracture of the distal tibia, 92
External fixation, not ORIF, as the treatment of choice for fractures of the distal radius, 570
External fixation is the treatment of choice for fractures of the tibial plafond, 583
Half-ring external fixation in the management of tibial plafond fractures, 200
Safe extracapsular placement of proximal tibia transfixation pins, 236
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats, 98
Use of the Hoffman 2 compact external fixator in the treatment of redisplaced unstable distal radial fractures, 501
Fixation, femoral
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Repair of supracondylar femur fracture and unilateral knee replacement at the same surgery, 388
Fixation, internal
A biomechanical analysis of internal fixation of complex tibial plateau fractures, 545
Determining the angle of screw placement for internal fixation of calcaneal fractures, 47
Immediate tibiocalcaneal arthrodesis with interposition fibular autograft for salvage after talus fracture: a case report, 589
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Internal fixation of femoral neck fractures with posterior comminution: a biomechanical study, 155
Minimally invasive plate osteosynthesis: does percutaneous plating disrupt femoral blood supply less than the traditional technique?, 401
Posterolateral approach for tibial pilon fractures: a report of two cases, 586
Two-staged delayed open reduction and internal fixation of severe pilon fractures, 85
Fixation, intramedullary
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
Fixation, open
Open reduction and internal fixation of pilon fractures, 573
Fixation, percutaneous
Closed reduction/percutaneous fixation of tibial plateau fractures: arthroscopic versus fluoroscopic control of reduction, 426
Fixation, plate and screw
Comparison of tricortical screw fixation versus a modified suture construct for fixation of ankle syndesmosis injury: a biomechanical study, 39
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
Plate fixation of fractures of the distal aspect of the radius: relative indications, 559
Schuhli augmentation of plate and screw fixation for humeral shaft fractures: a laboratory study, 196
Fixators, design
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Fluor-hydroxyapatite
The effect of surface material and roughness on bone screw stability, 477
Fluoroscopy
Closed reduction/percutaneous fixation of tibial plateau fractures: arthroscopic versus fluoroscopic control of reduction, 426
Fluoroscopy, intraoperative
Intraoperative fluoroscopy to evaluation fracture reduction and hardware placement during acetabular surgery, 414
Foot, injuries
Do foot injuries significantly affect the functional outcome of multiply injured patients?, 1
Foot pump
Facilitating edema resolution with a foot pump after calcaneus fracture, 43
Fracture Repair, International Society for
Editorial, 235
New engineering technology transfer in bone fracture management for the next century, 275
Abstracts from the Sixth Meeting of the International Society for Fracture Repair, 279
Fractures, ankle
Comparison of tricortical screw fixation versus a modified suture construct for fixation of ankle syndesmosis injury: a biomechanical study, 39
Functional outcome and quality of life in patients with type B ankle fractures: a two-year follow-up study, 363
Fractures, biomechanics
Abstracts from the Sixth Meeting of the International Society for Fracture Repair, 279
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Fractures, calcaneus
Determining the angle of screw placement for internal fixation of calcaneal fractures, 47
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Facilitating edema resolution with a foot pump after calcaneus fracture, 43
Vascularity of the lateral calcaneal flap: a cadaveric injection study, 73
Fractures, complications
Complications of intramedullary nailing for fractures of the humeral shaft: a review, 258
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Fractures, contaminated
Comparison of castile soap, benzalkonium chloride, and bacitracin as irrigation solutions for complex contaminated orthopaedic wounds, 332
High and low pressure pulsatile lavage of contaminated tibial fractures: an in vitro study of bacterial adherence and bone damage, 526
Fractures, CT scanning
Computed tomographic scanning of cervical spine fractures: Does it influence treatment?, 338
Fractures, displaced
Bohler's angle: correlation with outcome in displaced intra-articular calcaneal fractures, 554
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
Fractures, distal radius
External fixation, not ORIF, as the treatment of choice for fractures of the distal radius, 570
Plate fixation of fractures of the distal aspect of the radius: relative indications, 559
Use of the Hoffman 2 compact external fixator in the treatment of redisplaced unstable distal radial fractures, 501
Fractures, femoral
Biomechanical analysis of supracondylar femoral fractures fixed with modern retrograde intramedullary nails, 539
Broken Ender nails after fixation of concomitant ipsilateral fractures of the femoral neck and shaft, 509
Early versus delayed stabilization of pediatric femur fractures: analysis of 387 patients, 490
Intraarticular heterotopic ossification in the knee following intramedullary nailing of the fractured femur using a retrograde method, 385
Mechanical comparison of plates used in treatment of unstable subtrochanteric femur fractures, 534
Minimally invasive plate osteosynthesis: does percutaneous plating disrupt femoral blood supply less than the traditional technique?, 401
Results of intertrochanteric femur fractures treated with a 135-degree sliding screw with a two-hole side plate, 5
The "swashbuckler": a modified anterior approach for fractures of the distal femur, 138
Fractures, femoral head
Biomechanical evaluation of impaction fractures of the femoral head, 407
Fractures, femoral neck
Internal fixation of femoral neck fractures with posterior comminution: a biomechanical study, 155
Fractures, femoral shaft
Treatment of ununited femoral shaft fractures associated with locked nail breakage: comparison between closed and open revision techniques, 494
Fractures, fixation
The biomechanics of hybrid external fixation, 20
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Open reduction and internal fixation of pilon fractures, 573

Plate fixation of fractures of the distal aspect of the radius: relative indications, 559
Fractures, healing
Abstracts from the Sixth Meeting of the International Society for Fracture Repair, 279
Comparison of healing process in open osteotomy model and closed fracture model, 114
Effects of torsional rigidity on fracture healing: strength and mineralization in rat femora, 212
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
Regeneration of segmental diaphyseal defects in sheep tibiae using resorbable polymeric membranes: a preliminary study, 187
Fractures, hip
The effects of nutritional status on outcome after hip fracture, 164
Fractures, humeral shaft
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Complications of intramedullary nailing for fractures of the humeral shaft: a review, 258
Schuhli augmentation of plate and screw fixation for humeral shaft fractures: a laboratory study, 196
Fractures, intertrochanteric
Avascular necrosis of the femoral head after intertrochanteric fractures, 134
Fractures, intraarticular
Bohler's angle: correlation with outcome in displaced intra-articular calcaneal fractures, 554
Fractures, lateral condyle
Nonunion of a pediatric lateral condyle fracture without ulnar nerve palsy: sixty-year follow-up, 456
Pediatric elbow dislocation associated with a Milch type I lateral condyle fracture of the humerus, 458
Fractures, management
New engineering technology transfer in bone fracture management for the next century, 275
Fractures, metaphyseal
Mechanical effect of blocking screws in stabilizing tibia fractures with short proximal or distal fragments after insertion of small-diameter intramedullary nails, 550
Fractures, nonunion
High success rate with exchange nailing to treat a tibial shaft aseptic nonunion, 33
Nonunion of fracture of the neck of the radius: a report of three cases, 513
Fractures, open
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
High and low pressure pulsatile lavage of contaminated tibial fractures: an in vitro study of bacterial adherence and bone damage, 526
Salvage of open tibial fracture with segmental loss of tibial nerve: case report and review of the literature, 380
Fractures, palmar
Palmar (displaced) fracture of the proximal index metacarpal, 149
Fractures, pelvic
Bowel entrapment within pelvic fractures: a case report and review of the literature, 145
Common and external iliac artery injuries associated with pelvic fractures, 351
Early fixation of the vertically unstable pelvis: the role of iliosacral screw fixation of the posterior lesion, 107
Fractures, pilon
Comparative biomechanics of hybrid external fixation, 418
Early outcome of hybrid external fixation for fracture of the distal tibia, 92
Open reduction and internal fixation of pilon fractures, 573
A staged protocol for soft tissue management in the treatment of complex pilon fractures, 78
Two-staged delayed open reduction and internal fixation of severe pilon fractures, 85
Fractures, radial neck
Nonunion of fracture of the neck of the radius: a report of three cases, 513
Fractures, radius
The Monteggia lesion and ipsilateral supracondylar humerus and distal radius fractures, 60
Fractures, reduction
Intraoperative fluoroscopy to evaluation fracture reduction and hardware placement during acetabular surgery, 414
Fractures, remote assessment
Emerging technology: remote analysis of traumatic musculoskeletal radiographs transmitted by electronic mail, 516
Fractures, segmental
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
Fractures, spinal
Computed tomographic scanning of cervical spine fractures: Does it influence treatment?, 338
Fractures, stabilization
Early versus delayed stabilization of pediatric femur fractures: analysis of 387 patients, 490
Fractures, supracondylar
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
The Monteggia lesion and ipsilateral supracondylar humerus and distal radius fractures, 60
Repair of supracondylar femur fracture and unilateral knee replacement at the same surgery, 388
Fractures, talus
Immediate tibiocalcaneal arthrodesis with interposition fibular autograft for salvage after talus fracture: a case report, 589
Fractures, tibia
Early outcome of hybrid external fixation for fracture of the distal tibia, 92
Half-ring external fixation in the management of tibial plafond fractures, 200
Mechanical effect of blocking screws in stabilizing tibia fractures with short proximal or distal fragments after insertion of small-diameter intramedullary nails, 550
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
Osteogenic ability of free periosteal autografts in tibial fractures with severe soft tissue damage: an experimental study, 121
A prospective, randomized clinical trial comparing tibial nailing using fracture table traction versus manual traction, 463
Tibial fracture during removal of a tibial intramedullary nail, 271
Fractures, tibial pilon
Posterolateral approach for tibial pilon fractures: a report of two cases, 586
Fractures, tibial plafond
External fixation is the treatment of choice for fractures of the tibial plafond, 583
Fractures, tibial plateau
A biomechanical analysis of internal fixation of complex tibial plateau fractures, 545
Closed reduction/percutaneous fixation of tibial plateau fractures: arthroscopic versus fluoroscopic control of reduction, 426
Comparative biomechanics of hybrid external fixation, 418
Fractures, treatment
External fixation, not ORIF, as the treatment of choice for fractures of the distal radius, 570
Repair of supracondylar femur fracture and unilateral knee replacement at the same surgery, 388
Fractures, unstable
Mechanical comparison of plates used in treatment of unstable subtrochanteric femur fractures, 534
Functional outcomes
Do foot injuries significantly affect the functional outcome of multiply injured patients?, 1
Functional outcome and quality of life in patients with type B ankle fractures: a two-year follow-up study, 363
Immediate tibiocalcaneal arthrodesis with interposition fibular autograft for salvage after talus fracture: a case report, 589
Use of the Hoffman 2 compact external fixator in the treatment of redisplaced unstable distal radial fractures, 501

Gentamycin
Efficacy of gentamycin-impregnated resorbable hydroxyapatite cement in treating osteomyelitis in a rat model, 102
Gluteal artery, injury
Superior gluteal artery injury during iliosacral screw placement, 220
Greater trochanter
Removal of the deeply inserted proximal interlocking screw in the greater trochanter after femoral nailing, 506

Hand, fractures
Palmar (displaced) fracture of the proximal index metacarpal, 149
Healing, bone
Effects of torsional rigidity on fracture healing: strength and mineralization in rat femora, 212
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
Regeneration of segmental diaphyseal defects in sheep tibiae using resorbable polymeric membranes: a preliminary study, 187
Healing, factors
Regulation of osteoblast levels during bone healing, 356
Healing, fractures
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
Herzog's bow
Tibial fracture during removal of a tibial intramedullary nail, 271
Hip, dislocations
The east Baltimore lift: a simple and effective method for reduction of posterior hip dislocations, 56
Reduction of posterior hip dislocations in the lateral position using traction–countertraction: safer for the surgeon?, 373
Hip, fractures
The effects of nutritional status on outcome after hip fracture, 164
Humeral shaft, fractures
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Complications of intramedullary nailing for fractures of the humeral shaft: a review, 258
Schuhli augmentation of plate and screw fixation for humeral shaft fractures: a laboratory study, 196
Humeral shaft, nonunion
The spiral compression plate for proximal humeral shaft nonunion: a case report and description of a new technique, 141
Humerus, biomechanics
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Humerus, fractures
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
The Monteggia lesion and ipsilateral supracondylar humerus and distal radius fractures, 60
Pediatric elbow dislocation associated with a Milch type I lateral condyle fracture of the humerus, 458
Hybrid fixation
The biomechanics of hybrid external fixation, 20
Comparative biomechanics of hybrid external fixation, 418
Early outcome of hybrid external fixation for fracture of the distal tibia, 92
Hydroxyapatite cement, resorbable
Efficacy of gentamycin-impregnated resorbable hydroxyapatite cement in treating osteomyelitis in a rat model, 102

Iliac artery injury
Common and external iliac artery injuries associated with pelvic fractures, 351
Ilioinguinal approach
Anatomic study of the lateral femoral cutaneous nerve with respect to the ilioinguinal surgical dissection, 17
Iliosacral screws
Early fixation of the vertically unstable pelvis: the role of iliosacral screw fixation of the posterior lesion, 107
Superior gluteal artery injury during iliosacral screw placement, 220
Ilizarov fixator
Salvage of open tibial fracture with segmental loss of tibial nerve: case report and review of the literature, 380
Impaction fractures
Biomechanical evaluation of impaction fractures of the femoral head, 407
Implant, design
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Implant, stability
The effect of surface material and roughness on bone screw stability, 477
Infection
Complications of intramedullary nailing for fractures of the humeral shaft: a review, 258
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Safe extracapsular placement of proximal tibia transfixation pins, 236
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats, 98
Infection, bone
Segment transport employing intramedullary devices in tibial bone defects following trauma and infection, 170
Interleukin-1β
Regulation of osteoblast levels during bone healing, 356
Interlocking screw, removal
Removal of the deeply inserted proximal interlocking screw in the greater trochanter after femoral nailing, 506
Internal fixation
A biomechanical analysis of internal fixation of complex tibial plateau fractures, 545
Determining the angle of screw placement for internal fixation of calcaneal fractures, 47
Immediate tibiocalcaneal arthrodesis with interposition fibular autograft for salvage after talus fracture: a case report, 589
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Internal fixation of femoral neck fractures with posterior comminution: a biomechanical study, 155
Minimally invasive plate osteosynthesis: does percutaneous plating disrupt femoral blood supply less than the traditional technique?, 401
Open reduction and internal fixation of pilon fractures, 573
Posterolateral approach for tibial pilon fractures: a report of two cases, 586
Two-staged delayed open reduction and internal fixation of severe pilon fractures, 85
Intertrochanteric fractures
Avascular necrosis of the femoral head after intertrochanteric fractures, 134
Results of intertrochanteric femur fractures treated with a 135-degree sliding screw with a two-hole side plate, 5
Intestine, herniated
Bowel entrapment within pelvic fractures: a case report and review of the literature, 145
Intraarticular anatomy
Intraarticular anatomic risks of tibial nailing, 247
Intraarticular fracture
Two-staged delayed open reduction and internal fixation of severe pilon fractures, 85
Intramedullary nail, removal
Tibial fracture during removal of a tibial intramedullary nail, 271
Intramedullary nailing
Abstracts from the Sixth Meeting of the International Society for Fracture Repair, 279
Effects of retrograde femoral intramedullary nailing on the patellofemoral articulation, 13
Half-ring external fixation in the management of tibial plafond fractures, 200
Intraarticular heterotopic ossification in the knee following intramedullary nailing of the fractured femur using a retrograde method, 385
Mechanical effect of blocking screws in stabilizing tibia fractures with short proximal or distal fragments after insertion of small-diameter intramedullary nails, 550
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
A prospective, randomized clinical trial comparing tibial nailing using fracture table traction versus manual traction, 463
Removal of the deeply inserted proximal interlocking screw in the greater trochanter after femoral nailing, 506
Segment transport employing intramedullary devices in tibial bone defects following trauma and infection, 170
Should distal interlocking of tibial nails be performed from a medial or a lateral direction? Anatomical and biomechanical considerations, 27
Intramedullary nailing, biomechanics
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Intramedullary nailing, complications
Complications of intramedullary nailing for fractures of the humeral shaft: a review, 258
Intramedullary nailing, interlocking
Effects of torsional rigidity on fracture healing: strength and mineralization in rat femora, 212
Intramedullary nailing, locked
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Intramedullary nailing, retrograde
Biomechanical analysis of supracondylar femoral fractures fixed with modern retrograde intramedullary nails, 539
Intraoperative fluoroscopy
Intraoperative fluoroscopy to evaluation fracture reduction and hardware placement during acetabular surgery, 414
Irrigation solutions
Comparison of castile soap, benzalkonium chloride, and bacitracin as irrigation solutions for complex contaminated orthopaedic wounds, 332

Joint capsule
Safe extracapsular placement of proximal tibia transfixation pins, 236

Knee
Safe extracapsular placement of proximal tibia transfixation pins, 236
Knee, anatomy
Anatomy of the distal knee joint and pyarthrosis following external fixation, 241
Knee, ossification
Intraarticular heterotopic ossification in the knee following intramedullary nailing of the fractured femur using a retrograde method, 385
Knee, reconstruction
Anatomical reconstruction of the patellar tendon: a new technique with hamstring tendons and iliotibial tract, 375
Knee, replacement
Repair of supracondylar femur fracture and unilateral knee replacement at the same surgery, 388
Lateral position reduction
Reduction of posterior hip dislocations in the lateral position using traction–countertraction: safer for the surgeon?, 373
Lavage
High and low pressure pulsatile lavage of contaminated tibial fractures: an in vitro study of bacterial adherence and bone damage, 526
Letters to editor
The East Baltimore lift: a simple and effective method for reduction of posterior hip dislocations, 461

Patellofemoral biomechanics
Effects of retrograde femoral intramedullary nailing on the patellofemoral articulation, 13
Pediatrics, trauma
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
Early versus delayed stabilization of pediatric femur fractures: analysis of 387 patients, 490
The Monteggia lesion and ipsilateral supracondylar humerus and distal radius fractures, 60
Nonunion of a pediatric lateral condyle fracture without ulnar nerve palsy: sixty-year follow-up, 456
Pediatric elbow dislocation associated with a Milch type I lateral condyle fracture of the humerus, 458
Pelvis, fractures
Bowel entrapment within pelvic fractures: a case report and review of the literature, 145
Common and external iliac artery injuries associated with pelvic fractures, 351
Early fixation of the vertically unstable pelvis: the role of iliosacral screw fixation of the posterior lesion, 107
Pelvis, unstable
Early fixation of the vertically unstable pelvis: the role of iliosacral screw fixation of the posterior lesion, 107
Percutaneous iliosacral screw
Superior gluteal artery injury during iliosacral screw placement, 220
Periarticular fracture, repair
Repair of supracondylar femur fracture and unilateral knee replacement at the same surgery, 388
Periosteum, autografts
Osteogenic ability of free periosteal autografts in tibial fractures with severe soft tissue damage: an experimental study, 121
Pilon fractures
The biomechanics of hybrid external fixation, 20
Early outcome of hybrid external fixation for fracture of the distal tibia, 92
Open reduction and internal fixation of pilon fractures, 573
Posterolateral approach for tibial pilon fractures: a report of two cases, 586
A staged protocol for soft tissue management in the treatment of complex pilon fractures, 78

Pilon fractures *(continued)*
Two-staged delayed open reduction and internal fixation of severe pilon fractures, 85
Pilon fractures, biomechanics
Comparative biomechanics of hybrid external fixation, 418
Pinning
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
Pins, extracapsular placement
Safe extracapsular placement of proximal tibia transfixation pins, 236
Pin-tract infection
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats, 98
Plafond fractures
Half-ring external fixation in the management of tibial plafond fractures, 200
Two-staged delayed open reduction and internal fixation of severe pilon fractures, 85
Plain film
Computed tomographic scanning of cervical spine fractures: Does it influence treatment?, 338
Plate fixation
A biomechanical analysis of internal fixation of complex tibial plateau fractures, 545
Mechanical comparison of plates used in treatment of unstable subtrochanteric femur fractures, 534
Minimally invasive plate osteosynthesis: does percutaneous plating disrupt femoral blood supply less than the traditional technique?, 401
Plate fixation of fractures of the distal aspect of the radius: relative indications, 559
Schuhli augmentation of plate and screw fixation for humeral shaft fractures: a laboratory study, 196
The spiral compression plate for proximal humeral shaft nonunion: a case report and description of a new technique, 141
Plate fixation, design
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
Point contact fixators
Influence of the design for fixation implants on local infection: experimental study of dynamic compression plates versus point contact fixators in rabbits, 470
Polymeric membranes, resorbable
Regeneration of segmental diaphyseal defects in sheep tibiae using resorbable polymeric membranes: a preliminary study, 187
Polymethylmethacrylate pin sleeve
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats, 98
Portal, tibial
Intraarticular anatomic risks of tibial nailing, 247
Posterolateral approach
Posterolateral approach for tibial pilon fractures: a report of two cases, 586
Pressure
Biomechanical evaluation of impaction fractures of the femoral head, 407
Prosthesis, knee
Repair of supracondylar femur fracture and unilateral knee replacement at the same surgery, 388
Pseudarthrosis
Symptomatic pseudarthrosis of the acromion: report of a case and review of the literature, 63
Pseudo-dislocation
Pseudo-dislocation of the sternoclavicular joint, 222
Pulmonary complications
Early versus delayed stabilization of pediatric femur fractures: analysis of 387 patients, 490
Pulsatile irrigation
High and low pressure pulsatile lavage of contaminated tibial fractures: an in vitro study of bacterial adherence and bone damage, 526
Pyarthrosis
Anatomy of the distal knee joint and pyarthrosis following external fixation, 241

Quality of life
Functional outcome and quality of life in patients with type B ankle fractures: a two-year follow-up study, 363

Radial neck fracture, nonunion
Nonunion of fracture of the neck of the radius: a report of three cases, 513
Radiography
Emerging technology: remote analysis of traumatic musculoskeletal radiographs transmitted by electronic mail, 516
Radius, fractures
External fixation, not ORIF, as the treatment of choice for fractures of the distal radius, 570
The Monteggia lesion and ipsilateral supracondylar humerus and distal radius fractures, 60
Plate fixation of fractures of the distal aspect of the radius: relative indications, 559
Use of the Hoffman 2 compact external fixator in the treatment of redisplaced unstable distal radial fractures, 501
Randomized clinical study
A prospective, randomized clinical trial comparing tibial nailing using fracture table traction versus manual traction, 463
Reaming
Early changes in nutrient artery blood flow following tibial nailing with and without reaming: a preliminary study, 129
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
Reconstruction, tendon
Anatomical reconstruction of the patellar tendon: a new technique with hamstring tendons and iliotibial tract, 375
Reduction
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
Intraoperative fluoroscopy to evaluation fracture reduction and hardware placement during acetabular surgery, 414
Vascularity of the lateral calcaneal flap: a cadaveric injection study, 73
Reduction, closed
Closed reduction of posterior dislocation of the elbow: a simple technique, 58
Closed reduction/percutaneous fixation of tibial plateau fractures: arthroscopic versus fluoroscopic control of reduction, 426
Reduction, hip dislocation
Reduction of posterior hip dislocations in the lateral position using traction–countertraction: safer for the surgeon?, 373
Reduction, open
Immediate tibiocalcaneal arthrodesis with interposition fibular autograft for salvage after talus fracture: a case report, 589
Open reduction and internal fixation of pilon fractures, 573
Posterolateral approach for tibial pilon fractures: a report of two cases, 586
Two-staged delayed open reduction and internal fixation of severe pilon fractures, 85
Reduction, techniques
The east Baltimore lift: a simple and effective method for reduction of posterior hip dislocations, 56
Retrograde intramedullary rod
Intraarticular heterotopic ossification in the knee following intramedullary nailing of the fractured femur using a retrograde method, 385
Retrograde nailing
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Effects of retrograde femoral intramedullary nailing on the patellofemoral articulation, 13

Safe zone
Intraarticular anatomic risks of tibial nailing, 247
Scanning electron microscopy
High and low pressure pulsatile lavage of contaminated tibial fractures: an in vitro study of bacterial adherence and bone damage, 526
Schuhli locking nuts
Schuhli augmentation of plate and screw fixation for humeral shaft fractures: a laboratory study, 196
Screw fixation
Biomechanical study of atlantoaxial arthrodesis: transarticular screw fixation versus modified Brooks posterior wiring, 483
Comparison of tricortical screw fixation versus a modified suture construct for fixation of ankle syndesmosis injury: a biomechanical study, 39
Early fixation of the vertically unstable pelvis: the role of iliosacral screw fixation of the posterior lesion, 107
Schuhli augmentation of plate and screw fixation for humeral shaft fractures: a laboratory study, 196
Screws
Internal fixation of femoral neck fractures with posterior comminution: a biomechanical study, 155
Intraoperative fluoroscopy to evaluation fracture reduction and hardware placement during acetabular surgery, 414
Screws, blocking
Mechanical effect of blocking screws in stabilizing tibia fractures with short proximal or distal fragments after insertion of small-diameter intramedullary nails, 550
Screws, interlocking
Removal of the deeply inserted proximal interlocking screw in the greater trochanter after femoral nailing, 506
Screws, material
The effect of surface material and roughness on bone screw stability, 477
Screws, mechanical strength
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Screws, placement
Determining the angle of screw placement for internal fixation of calcaneal fractures, 47
Superior gluteal artery injury during iliosacral screw placement, 220
Segmental bone, defects
Regeneration of segmental diaphyseal defects in sheep tibiae using resorbable polymeric membranes: a preliminary study, 187
Segmental fractures
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
Segmental transport
Segment transport employing intramedullary devices in tibial bone defects following trauma and infection, 170
SF-36 questionnaire
Functional outcome and quality of life in patients with type B ankle fractures: a two-year follow-up study, 363
Side plate
Results of intertrochanteric femur fractures treated with a 135-degree sliding screw with a two-hole side plate, 5
Sliding-screw nail implant
Results of intertrochanteric femur fractures treated with a 135-degree sliding screw with a two-hole side plate, 5
Smoking
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Soap
Comparison of castile soap, benzalkonium chloride, and bacitracin as irrigation solutions for complex contaminated orthopaedic wounds, 332
Soft tissue, damage
Osteogenic ability of free periosteal autografts in tibial fractures with severe soft tissue damage: an experimental study, 121
Soft tissue, management
A staged protocol for soft tissue management in the treatment of complex pilon fractures, 78

Spinal fractures
Abstracts from the Sixth Meeting of the International Society for Fracture Repair, 279
Spine, CT scanning
Computed tomographic scanning of cervical spine fractures: Does it influence treatment?, 338
Stabilization
Early versus delayed stabilization of pediatric femur fractures: analysis of 387 patients, 490
Sternoclavicular joint, dislocation
Pseudo-dislocation of the sternoclavicular joint, 222
Steroids, anabolic
Acute compartment syndrome of the triceps and deltoid, 225
Strength, bone
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Stress riser
A comparison of mechanical strength of the femoral neck following locked intramedullary nailing using oblique versus transverse proximal screws, 160
Subtalar arthritis
Determining the angle of screw placement for internal fixation of calcaneal fractures, 47
Subtrochanteric femur fracture
Mechanical comparison of plates used in treatment of unstable subtrochanteric femur fractures, 534
Supracondylar fractures
Biomechanical analysis of supracondylar femoral fractures fixed with modern retrograde intramedullary nails, 539
The Monteggia lesion and ipsilateral supracondylar humerus and distal radius fractures, 60
Supracondylar fractures, displaced
Early versus delayed reduction and pinning of type III displaced supracondylar fractures of the humerus in children: a comparative study, 51
Surgery
Intraoperative fluoroscopy to evaluation fracture reduction and hardware placement during acetabular surgery, 414
Surgery, anatomic variations
Anatomical variations of the lateral femoral cutaneous nerve and the consequences for surgery, 207
Surgery, approaches
Anatomic study of the lateral femoral cutaneous nerve with respect to the ilioinguinal surgical dissection, 17
Vascularity of the lateral calcaneal flap: a cadaveric injection study, 73
Surgery, complications
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Surgery, devices
Use of the Hoffman 2 compact external fixator in the treatment of redisplaced unstable distal radial fractures, 501
Surgery, staged protocol
A staged protocol for soft tissue management in the treatment of complex pilon fractures, 78
Surgery, techniques
Anatomical reconstruction of the patellar tendon: a new technique with hamstring tendons and iliotibial tract, 375
Minimally invasive plate osteosynthesis: does percutaneous plating disrupt femoral blood supply less than the traditional technique?, 401
The spiral compression plate for proximal humeral shaft nonunion: a case report and description of a new technique, 141
Treatment of ununited femoral shaft fractures associated with locked nail breakage: comparison between closed and open revision techniques, 494
Two-staged delayed open reduction and internal fixation of severe pilon fractures, 85
Surgical exposures
The "swashbuckler": a modified anterior approach for fractures of the distal femur, 138
Sutures
Comparison of tricortical screw fixation versus a modified suture construct for fixation of ankle syndesmosis injury: a biomechanical study, 39
Syndesmosis injury
Comparison of tricortical screw fixation versus a modified suture construct for fixation of ankle syndesmosis injury: a biomechanical study, 39

Table traction
A prospective, randomized clinical trial comparing tibial nailing using fracture table traction versus manual traction, 463
Talus, fractures
Immediate tibiocalcaneal arthrodesis with interposition fibular autograft for salvage after talus fracture: a case report, 589
Tarsal bones
Determining the angle of screw placement for internal fixation of calcaneal fractures, 47
Technology
Emerging technology: remote analysis of traumatic musculoskeletal radiographs transmitted by electronic mail, 516
New engineering technology transfer in bone fracture management for the next century, 275
Tendon, reconstruction
Anatomical reconstruction of the patellar tendon: a new technique with hamstring tendons and iliotibial tract, 375
Tibia, anatomy
Intraarticular anatomic risks of tibial nailing, 247
Tibia, defects
Segment transport employing intramedullary devices in tibial bone defects following trauma and infection, 170
Tibia, fractures
Early outcome of hybrid external fixation for fracture of the distal tibia, 92
Half-ring external fixation in the management of tibial plafond fractures, 200
High and low pressure pulsatile lavage of contaminated tibial fractures: an in vitro study of bacterial adherence and bone damage, 526
Influence of plate design on cortical bone perfusion and fracture healing in canine segmental tibial fractures, 178
Mechanical effect of blocking screws in stabilizing tibia fractures with short proximal or distal fragments after insertion of small-diameter intramedullary nails, 550
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
Osteogenic ability of free periosteal autografts in tibial fractures with severe soft tissue damage: an experimental study, 121
Posterolateral approach for tibial pilon fractures: a report of two cases, 586
A prospective, randomized clinical trial comparing tibial nailing using fracture table traction versus manual traction, 463
Salvage of open tibial fracture with segmental loss of tibial nerve: case report and review of the literature, 380
Tibial fracture during removal of a tibial intramedullary nail, 271
Tibia, nailing
Early changes in nutrient artery blood flow following tibial nailing with and without reaming: a preliminary study, 129
Tibia transfixation pins, placement
Safe extracapsular placement of proximal tibia transfixation pins, 236
Tibial aneurysm
Anterior tibial aneurysm following inversion injury to the ankle, 511
Tibial nails
Should distal interlocking of tibial nails be performed from a medial or a lateral direction? Anatomical and biomechanical considerations, 27
Tibial nerve, graft
Salvage of open tibial fracture with segmental loss of tibial nerve: case report and review of the literature, 380
Tibial plafond fractures
External fixation is the treatment of choice for fractures of the tibial plafond, 583
Tibial plateau, fractures
A biomechanical analysis of internal fixation of complex tibial plateau fractures, 545
The biomechanics of hybrid external fixation, 20
Closed reduction/percutaneous fixation of tibial plateau fractures: arthroscopic versus fluoroscopic control of reduction, 426
Comparative biomechanics of hybrid external fixation, 418
Tibial shaft, nonunion
High success rate with exchange nailing to treat a tibial shaft aseptic nonunion, 33
Tibiocalcaneal arthrodesis
Immediate tibiocalcaneal arthrodesis with interposition fibular autograft for salvage after talus fracture: a case report, 589
Titanium
The effect of surface material and roughness on bone screw stability, 477
Tobramycin-impregnated polymethylmethacrylate pin sleeve
Use of a tobramycin-impregnated polymethylmethacrylate pin sleeve for the prevention of pin-tract infection in goats, 98
Torsional biomechanics
Biomechanical comparison of bending and torsional properties in retrograde intramedullary nailing of humeral shaft fractures, 344
Effects of torsional rigidity on fracture healing: strength and mineralization in rat femora, 212
Traction
A prospective, randomized clinical trial comparing tibial nailing using fracture table traction versus manual traction, 463
Traction–countertraction
Reduction of posterior hip dislocations in the lateral position using traction–countertraction: safer for the surgeon?, 373
Trauma
Controversial topics, 525
Segment transport employing intramedullary devices in tibial bone defects following trauma and infection, 170
Trauma, avascular necrosis
Changes on magnetic resonance images after traumatic avascular necrosis of the femoral head, 268
Trauma, education
Guidelines for orthopaedic trauma fellowships, 437
Orthopaedic trauma education, 432
Orthopaedic trauma education: visions for the future through the OTA, 433
Resident education curriculum for orthopaedic trauma, 441
Trauma, foot
Do foot injuries significantly affect the functional outcome of multiply injured patients?, 1
Trauma, pediatric
Early versus delayed stabilization of pediatric femur fractures: analysis of 387 patients, 490
Trauma, remote analysis
Emerging technology: remote analysis of traumatic musculoskeletal radiographs transmitted by electronic mail, 516
Trauma, vascular
Common and external iliac artery injuries associated with pelvic fractures, 351
Trauma centers
Orthopaedic trauma education: visions for the future through the OTA, 433
Treatment, complications
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Treatment, strategies
Computed tomographic scanning of cervical spine fractures: Does it influence treatment?, 338
The devil is in the details (meeting address), 327
Triceps compartment syndrome
Acute compartment syndrome of the triceps and deltoid, 225

Ulnar nerve palsy
Nonunion of a pediatric lateral condyle fracture without ulnar nerve palsy: sixty-year follow-up, 456
Ultrasound, low-intensity
No effect of low-intensity ultrasound on healing time of intramedullary fixed tibial fractures, 252
Unfallchirurg
Selected abstracts from *Der Unfallchirurg*, 70, 230, 391, 520

Vascular injury
Common and external iliac artery injuries associated with pelvic fractures, 351
Superior gluteal artery injury during iliosacral screw placement, 220
Vascularity
Vascularity of the lateral calcaneal flap: a cadaveric injection study, 73
Visual analogue scale
Functional outcome and quality of life in patients with type B ankle fractures: a two-year follow-up study, 363

Wire towrope
Segment transport employing intramedullary devices in tibial bone defects following trauma and infection, 170
Wiring
Biomechanical study of atlantoaxial arthrodesis: transarticular screw fixation versus modified Brooks posterior wiring, 483
Wounds, complication
Early wound complications of operative treatment of calcaneus fractures: analysis of 190 fractures, 369
Wounds, healing
Comparison of healing process in open osteotomy model and closed fracture model, 114
Wounds, irrigation
Comparison of castile soap, benzalkonium chloride, and bacitracin as irrigation solutions for complex contaminated orthopaedic wounds, 332
Wounds, management
A staged protocol for soft tissue management in the treatment of complex pilon fractures, 78

STATEMENT OF OWNERSHIP, MANAGEMENT, AND CIRCULATION (Act of August 12, 1970: Section 3685, Title 39 United States Code). Publication Title—Journal of Orthopaedic Trauma; Publication Number—0890-5339; Filing Date—October 1, 1999; Issue Frequency—8 times per year; Number of Issues Published Annually—8; Annual Subscription Price—$189.00; Complete Mailing Address of Known Office of Publication—Lippincott Williams & Wilkins, 12107 Insurance Way, Hagerstown, MD 21740; Complete Mailing Address of Headquarters or General Business Office of Publisher—227 East Washington Square, Philadelphia, PA 19106; Publisher—Lippincott Williams & Wilkins, 227 East Washington Square, Philadelphia, PA 19106; Editor—Roy W. Sanders, M.D., 4 Columbia Drive, Suite 710, Tampa, FL 33606; Managing Editor—Caren P. Erlichman, Lippincott Williams & Wilkins, 227 East Washington Square, Philadelphia, PA 19106; Owner—Lippincott Williams & Wilkins, a wholly owned subsidiary of Wolters Kluwer US/Wolters Kluwer nv, 227 East Washington Square, Philadelphia, PA 19106; 351 West Camden Street, Baltimore, MD 21201; 345 Hudson Street, New York, NY 10014; Stadouderskade 1, 1054 FS Amsterdam, The Netherlands; Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages, or Other Securities—none. Issue Date for Circulation Data—Vol. 13, Iss. 6; Extent and Nature of Circulation—a. Total Number of Copies (*net press run*), average 3525, actual 3600; b. Paid and/or Requested Circulation: (1) Paid/Requested Outside-County Mail Subscriptions Stated on Form 3541 (*including advertiser's proof and exchange copies*), average 2607, actual 2714; (2) Paid In-County Subscriptions (*including advertiser's proof and exchange copies*), average N/A, actual N/A; (3) Sales Through Dealers and Carriers, Street Vendors, Counter Sales, and Other Non-USPS Paid Distribution, average N/A, actual N/A; (4) Other Classes Mailed Through the USPS, average N/A, actual N/A; c. Total Paid and/or Requested Circulation [*sum of b (1), (2), (3), and (4)*], average 2607, actual 2714; d. Free Distribution by Mail (*samples, complimentary, and other free*): (1) Outside-County as Stated on Form 3541, average 108, actual 133; (2) In-County as Stated on Form 3541, average N/A, actual N/A; (3) Other Classes Mailed Through the USPS, average N/A, actual N/A; e. Free Distribution Outside the Mail (*carriers or other means*), average N/A, actual N/A; f. Total Free Distribution (*sum of d and e*), average 108, actual 133; g. Total Distribution (*sum of c and f*), average 2715, actual 2847; h. Copies Not Distributed, average 810, actual 753; i. Total (*sum of g and h*), average 3525, actual 3600; j. Percent Paid and/or Requested Circulation (*c divided by g times 100*), average 96%, actual 95%. I certify that all information furnished above is true and complete. Abbe Nelson, *Manager, Periodical Operations*.
